- 4 rubber “performance pads” per deck provide HOT CUE, AUTO LOOP, MANUAL LOOP and SAMPLER functions
- New “Filter Fade” function for extremely smooth blending transitions when using the cross-fader
- Large jog wheels for precise scratching and mixing capabilities
- Premium construction and look including large aluminum jog plates
- USB Powered with built-in sound card
- Integrated handles for added convenience and portability

FEATURES

1 Mixing With Serato®

The controller is packaged with Serato DJ Intro software to provide basic DJ functionalities. An out-of-the-box experience with the software includes HOT CUE, SAMPLER and other cool effects. For expanded functionalities and effects, the controller can be used with Serato DJ (optional, paid software) offering users the ability to arrange tracks using Slip Mode, access various effect functions available from iZotope®, and record tracks with DJ mixes using the record function.

2 Performance Pads

Four large rubber "performance pads" are found under each jog wheel to provide HOT CUE, AUTO LOOP, MANUAL LOOP and SAMPLER functions, while a second row of rubberized pads offers the basic DJ functions, Play, Cue, Sync and Shift.

3 Filter Fade Function

The new Filter Fade function takes mixing with the crossfader beyond simply fading the volume of one channel up and the other down. By hitting the Filter Fade button, DJs can add two high pass filters to the crossfader - so both volume and base filter can be manipulated using just one hand. Seamless mixing becomes effortless, and DJs can use their spare hand to unleash their creativity, triggering samples, loops and cues.

4 Fine-Tuned Jog Wheels

The DDJ-SB is designed as an all-in-one system utilizing a 2-channel mixer and two decks that each feature a large jog wheel for great control while mixing and scratching. Each jog wheel's resistance was fine-tuned to provide users with the best "feel" and the shortest latency.

5 High-End Design

For a stylish and sophisticated look and feel, the DDJ-SB sports the same premium look as its big brothers, including large aluminum jog plates.

6 Additional Features

- **USB Power** – The controller can be powered through the USB connection of a laptop¹.
- **Built-in Sound Card (Audio Interface)** – Simple connection to a laptop with a single USB cable.
- **Integrated Handles** – The controller features grip handles on each side for added convenience.

¹ Limitations apply to some functions. Note that it may not be possible to charge this device with bus power depending on the power supply rating of the laptop's USB port. In such cases, please connect the device with the enclosed AC adapter.
